

Advanced Software Architecture Preliminary Project Plan

Brief Project Description

An Object-Oriented KWIC indexing system that generates circular word shifts from input text and displays them in alphabetical order, forming the core of a web-based search engine.

Team Members:

- Yasin Sazid - (yasin.sazid@utdallas.edu)
- Alessandro Botta - (alessandro.botta@utdallas.edu)
- Sina Moghtased - (sina.moghtased@utdallas.edu)

Deliverable	Due Date	Team Leader	Tools
Preliminary Project Plan	09/11/2026	Sina Moghtased	Google Docs
Interim Project I (Preliminary definition)	10/01/2026	Sina Moghtased	Next.js (Front-End) - Node.js (Back-End)- Github(Repository) - Vercel (Deployment)
Final Project I Submission	10/15/2026	Sina Moghtased	Next.js (Front-End) - Node.js (Back-End) - Github(Repository) - Vercel(Deployment)
Interim project II Document Submission (Brief description of what should be developed)	11/12/2026	Sina Moghtased	Next.js (Front-End) - Node.js (Back-End) - Github(Repository) - Vercel(Deployment)
Final Project II Submission	12/01/2026	Sina Moghtased	Next.js (Front-End) - Node.js (Back-End) - Github(Repository) - Vercel(Deployment)
